Whole School Information

Group 8's taking initiative!

Last Sunday Group 8 students arranged to go on a picnic together at the Oude Haven. A few children arrived early, saw the state of the park, and decided to do something about it. Using their own money, they bought cleaning supplies and together agreed to clean up the area before and during their picnic.

Even more impressively, they have decided to turn this into a regular initiative. They plan to meet every two weeks in different parks near their homes, bringing both their picnic and clean-up supplies. They also intend to fund the supplies through the statiegeld from bottles and cans they bring and collect.

IB Conferences in Twente and Prague

The end of the week has been a busy and rewarding learning experience. Nadia B, Juliska, and Claire attended their IB evaluation conference in Twente, while Islay and Kelly travelled to Prague for an IB Early Years conference. We look forward to them sharing their new knowledge and insights with the team.

Avondvierdaagse

What a great turn out with 75 walkers this week! Despite the rain everyone has enjoyed being together and walking 5km. One more to go and wishing you all a dry walk!

Global Parent Picnic

We were fortunate to celebrate Global Parents Day in the sunshine, despite the week's changeable weather. Thank you to all our families for making it such a wonderful celebration of our community. It was a joy to come together and recognise the important role that families play in supporting our children's learning and growth.

Inquiry Insights

Group 2 releasing butterflies

On Wednesday group 2's had the excitement of finally letting their butterflies go as they have fully grown to enjoy their freedom. The life cycle is now complete.

Group 3 Bee Farm

Hidden deep in the Corversbos group 3's had the opportunity to learn about the bee farm. Amongst other things, the bee keeper showed them how to stop the queen bee. Back in class, the students will be tasting the honey we brought back, produced by the exact same bees they observed.
